

In the specification:

Please delete the Table of Contents appearing on pages i to iii of the specification.

At page 1, line 11, replace "07/131/926" with --07/131,926--.

At page 5, line 1, replace "uses" with --use--.

At page 15, line 3, after "donor site and" insert - - is linked upstream from - -.

At page 17, line 35, replace "be into" with --be transfected into--.

At page 18, line 1, delete "transfected".

At page 18, line 6, replace "Psi2" with --Psi-2--.

At page 29, line 11, delete "13" and insert - 3 - -.

At page 29, line 21, after "ligated" insert - - to --.

At page 33, line 29, replace "feed" with --fed--.

In the claims:

Please amend claims 1, 10, 21, and 35-37 as follows.

Claim 1 (Three Times Amended). A recombinant retroviral vector useful to nonselectively [transfect target] transduce cells, comprising:

- (a) a 5' LTR derived from a retrovirus of interest;
- (b) a splice donor site located 3' to said 5' LTR;
- (c) a Psi packaging site located 3' to said splice donor site;
- (d) a consensus splice acceptor site located 3' to said Psi packaging site;
- (e) an insertion site for a gene of interest located 3' to said consensus splice acceptor site;
- (f) a 3' LTR derived from a retrovirus of interest located 3' to said insertion site; and

wherein said vector does not contain a complete selectable marker gene used for the transduction of said cells, or a complete *gag*, *env*, or *pol* gene between said 5' and 3' LTR.
